

Selected Statistical Models in Non-life Insurance with **R**

Alicja Wolny-Dominiak, Stanisław Wanat, Daniel Sobiecki

December 3, 2017

Contents

Contents	2
1 Models with Fixed Effects in Ratemaking	13
1.1 The Theory of Ratemaking	14
1.2 Models with Fixed Effects	18
Nonlinear Model	18
Example - Estimation of $(\lambda, \alpha)'$ in Gamma Distri- bution	20
Generalized Linear Model	21
Example - Fitting GLM Inverse-Gaussian	24
GLM Tweedie	26
Example - Density of Tweedie Distribution	27
Example - Estimation of p	28
Example - Fitting GLM Tweedie	29
Double-Generalized Linear Model	31
Example - Fitting DGLM Poisson	32
Models for Count Variables	33
Example - Estimation of λ in Poisson Distribution	35
Example - Estimation of Parameters in ZI Distri- butions	37
Example - Simulation Random Samples from ZINB and ZIGP	38
Example - Probability Mass Function of ZTPois	39
Example - Estimation of λ in ZTPois	41
Tweedie's Compound Poisson Model	41
Example - Simulation from Tweedie's Compound Poisson Distribution	42

Example - Estimation of Tweedie's Compound Poisson Model	44
Testing and Comparing Models	45
Example - CV for GLM	49
Example - Bootstrap MSEP and Confidence Interval	51
1.3 Models with Fixed Effects in Ratemaking	52
Claim Severity GLM	52
Example - Modeling Claim Severity with GLM Gamma	54
Claim Frequency Model	57
Example - Modeling Claim Frequency with GLM Poisson	58
Example - ZIP Claim Frequency Model	67
Aggregate Value of Claims Model	70
Example - Fitting GLM TCPoisson	71
Example - Zero-inflated TCPoisson Model	75
Pure Risk Premium	77
Example - Pure Risk Premium Estimation	77
Extreme Value Theory	79
Example - Mean excess plot	81
Example - Bootstrap goodness-of-fit test for GPD	82
2 Mixed Models in Ratemaking	84
2.1 Mixed Models	84
Model structure and estimation methods	85
Generalized Linear Mixed Model	88
Example - fitting the GLMM	90
Hierarchical Generalized Linear Model	92
Example - Fitting HGLM Inverse-Gaussian	94
Mixed Poisson Model	95
Example - Estimation of Parameters of NB Distribution	97
Example - Estimation of Parameters of Mixed Poisson Distribution	102
2.2 Mixed Models in Ratemaking	102
HGLM for Portfolio with Clusters	104

Pure Risk Premium	107
Example - Frequency-severity HGLM	108
Example - Modeling the Aggregate Value of Claims with TCPoisson Mixed Model	113
2.3 A Posteriori Ratemaking	115
Claim Frequency Mixed Poisson Model with Risk Profile for Cross-sectional Data	117
Example - NB Claim Frequency	118
Example - Mixed Poisson A Posteriori Ratemaking - Cross-sectional Data	122
Claim Frequency Mixed Poisson Model with Risk Profile for Longitudinal Data	124
Example - A Posteriori Risk Premium - Longitudi- nal Data	125
3 Miscellaneous Models	129
3.1 Copulas in Ratemaking	130
Definition of Copula	130
Example - Normal Copula Plot	131
Example - Multivariate Distributions Constructed from Copulas	131
Fitting Copula	134
Example - Fitting Gaussian Copula Parameter . . .	135
Bivariate copula	138
Example - Estimation of Bivariate Copula Param- eters using the package VineCopula	140
Example - setting the value of $D_1(\cdot)$	140
3.2 Copula-based Ratemaking	140
Copula-based Frequency-severity Model	141
Example - Fitting Frequency-severity Parameters .	144
Example - the joint and conditional densities of the variable (Y_i, N_i)	146
Example - Copula-based distribution of the aggre- gate value of claims for the whole port- folio	148

3.3	Ratemaking for Dependent LOBs	150
	Total Pure Premium	151
	Example - Total Pure Premium with CPoisson GLM	151
	Quantile premium for comonotonic LOBs	157
	Example - Quantile Premiums in Groups - Comono-	
	tonicity	159
	Copula-based Quantile Premium for Dependent LOBs . . .	161
	Example - Copula-based Quantile Premium for De-	
	pendent LOBs	162
3.4	Loss reserving	167
3.5	Loss triangle and Loss Reserve	168
3.6	Chain-ladder loss reserve	170
	Example - Age to Age Factor	170
	Example - Chain-ladder Loss Reserve	172
3.7	GLM Loss Reserve and RMSEP	173
	The Model	173
	Analytical and Bootstrap RMSEP	174
	Example - Loss Reserving Using GLM	175
3.8	HGLM Loss Reserve and Bootstrap Errors of Prediction .	176
	The Model	176
	Example - Claim Reserving Using HGLM	177
	Bootstrap RMSEP and QAPE for HGLM	178
	Example - Bootstrap RMSEP and QAPE for HGLM	
	Loss Reserve	180
	List of Figures	182
	List of Tables	183
	Bibliography	185
A	The List of R packages in order of appearance	196
